To: Wildfire & Rural Firefighting Organizations

Re: **Shallow Drafting from Natural Water sources... safely!**

Introducing the Fire Ceptor - "The Portable Drydrant". Designed for Natural Source Drafting **in only 6"-12" of water**. This Patented Technology provides phenomenal protection from internal pump damage - for both **portable & truck mounted units**.

- Flotation or Suspension **not required**
- Indispensable for **protecting wildfire pumps**
- **Consistent & reliable flows** in shallow water, even in gravel, sand & weeds.

See [ProtectaPump.com](http://ProtectaPump.com) for videos of "The Portable Drydrant" in action.  
***(Works like a dry hydrant, but it's portable!)***
